REPORT OF THE TRUSTEES.

THE BOSTON CITY HOSPITAL,

BOSTON, January 31, 1895.

HON. EDWIN U. CURTIS,

Mayor of the City of Boston :

The Trustees of The Boston City Hospital, in compliance with the Ordinances, respectfully present herewith their annual report *for the year beginning February 1, 1894, to January 31, 1895, inclusive.*

NUMBER OF PATIENTS AND EXPENDITURES.

Number of patients remaining in the hospital

January 31, 1894	535
----------------------------	-----

Admitted from February 1, 1894, to January
31, 1895 :

Medical	3,053	
Surgical	3,197	
Contagious	1,123	
Ophthalmic	84	
Aural	83

	<hr/>	8,064

Treated during the year	8,599
-----------------------------------	-------

Discharged during the year	7,056
--------------------------------------	-------

Died " "	1,060	
	<hr/>	8,116

Number of patients remaining in the hospital

January 31, 1895	483
----------------------------	-----

Largest number of patients in the hospital at any one time	540
---	-----

Smallest number of patients in the hospital at any one time	375
--	-----

Daily average number of patients	462 $\frac{54}{100}$
Average number of days' stay of patients . .	19 $\frac{62}{100}$
Number of patients accidentally injured, admitted	1,401
Number of weeks' treatment given in hospital,	24,118
Number of days' treatment given in hospital .	168,830
Number of applicants for admission to hospital,	11,617
Number of applicants rejected	3,553
Number of patients treated in Convalescent Home	431

Number of patients treated in the out-patient departments,
classified according to diseases :

For medical diseases	3,323
“ surgical “	7,590
“ diseases of the eye	1,656
“ “ “ “ ear	605
“ “ “ “ skin	1,048
“ “ “ women	784
“ “ “ the nervous system	604
“ “ “ the throat	967

Surgical out-patients treated in the accident-rooms, and not elsewhere included

1,496

Total number of out-patients

18,073

Number of visits by patients to the out-patient departments,
classified according to diseases :

For medical diseases	6,142
“ surgical “	34,497
“ diseases of the eye	5,942
“ “ “ “ ear	3,779
“ “ “ “ skin	2,393
“ “ “ women	2,324
For diseases of the nervous system	3,247
“ “ “ the throat	3,822

Surgical out-patients treated at accident-room,
and not elsewhere included

1,496

Total number of visits of out-patients

63,642

The entire amount expended for all departments of the hospital during the year was \$261,538.03. Of this amount \$244,712.94 was on account of the hospital proper and Epidemic Hospital, \$6,828.12 on account of the eight outpatient departments, \$8,115.20 for the Convalescent Home, \$1,629.45 on account of determining the settlement of patients, and \$252.32 on account of new buildings.

From the amount expended for the hospital proper, \$244,712.94, should be deducted the difference in the amount of stock on hand February 1, 1895, which was \$111.89 more than we possessed on February 1, 1894, making the total amount chargeable to the expenditures of the year, \$244,601.05. Of the total amount expended, several items were for purposes not within the ordinary yearly maintenance of the patients. From the itemized table of disbursements it will be seen that there were expended for claims awarded, \$145; expense incurred in card cataloguing clinical records, etc., \$714; fences, etc., \$120.57; tents, \$497.76; medical and surgical reports, \$397.40; making a total of \$1,874.73, which, deducted from the total expenditures of the Hospital Department, leaves \$242,726.32 properly chargeable to current expenses. This amount, divided among 8,599 patients for 24,118 weeks' board, gives \$10.06 as the cost to the city of each patient per week. The weekly cost of each patient at the Convalescent Home has been \$6.35. The trustees have collected and paid into the city treasury in cash the sum of \$62,226.14, this sum having been received principally on account of board of patients. No allowance has been made for this amount in computing the weekly net cost of each patient to the city.

The maximum number of patients in the hospital at any one time was 540, or 9 less than last year. The minimum number at any one time was 375. The daily average number of patients was $462\frac{5.4}{100}$, or 5 + more than last year. The total number of patients treated in the wards was 8,599, which was 164 less than last year, and 363 more than two years ago.

The report of the Superintendent, presented herewith,

contains, besides other information, a more detailed statement of the expenditures of the year, and of the number of patients admitted, and is accompanied by the medical and surgical statistics. These tables give in detail the number of patients treated in the hospital, and the number treated in the out-patient departments during the year, with classified statements of their diseases and results of treatment.

PAYING PATIENTS.

During the year there have been collected on account of the board of paying patients of all classes the following amounts: From the Commonwealth, for the board of patients for whom the Commonwealth is responsible, \$38,402.11; from other cities and towns, \$7,273.43; from private room and ward paying patients, collected by the Superintendent, \$15,162.44; making the total income from all classes of paying patients, \$60,837.98.

The private rooms for patients have been occupied nearly all the year, and in the Surgical Services the demand for such accommodations has been larger than ever before. On account of the growth of the hospital, several of the rooms heretofore used for private patients have been used for other purposes, — for the increased number of House Staff and also for nurses.

PRESENT CAPACITY OF THE HOSPITAL.

There has been no increase in the bed capacity of the hospital during the last year, the number of beds available being five hundred. Before the close of the present year, the increased accommodations afforded by the new department for infectious diseases, as well as the new two-storied surgical building and the enlargement of the operating building, which includes the surgical ward for children and the private rooms for surgical paying patients, will largely increase the capacity of the hospital, and afford us our much desired relief.

HOSPITAL RENOVATIONS.

As will be pointed out elsewhere, the amount of money available for renovations and repairs has been small. As will be seen by the Superintendent's report, the amount expended for repairs in all departments of the hospital has been \$10,126 only, as against \$18,296 for 1893-94, \$21,275 for 1892, and \$25,625 for 1891. The number of patients requiring treatment has been yearly increasing, until now it is twenty per cent. more than it was five years ago, with an addition of only two per cent. in annual appropriation. The patients could be taken care of only at the expense of the money usually expended in keeping the buildings in repair. As a result, no expenditures have been made except those absolutely necessary, and, indeed, many repairs which were necessary have been neglected. Seven wards have been renovated by painting, kalsomining, and putting the ward furniture in good sanitary condition. Other than this, very little has been done except what was absolutely demanded.

THE CONVALESCENT HOME.

The Convalescent Home has now been in operation four years, and has proved a great addition in the treatment of hospital patients. The benefits of the Home have been conferred upon 431 patients, who have been given 8,943 days' board. This has been done at a weekly cost of \$6.35 per patient. The capacity of the Home remains the same as last year, and there has been no change in that branch of the hospital service.

The present Convalescent Home can only be used by women and children. The Trustees believe that it would be very desirable for the hospital to have a Convalescent Home for men and boys.

OUT-PATIENT DEPARTMENTS.

The number of patients treated in the various Out-Patient Departments has been 18,073, and the number of visits, 63,642. The number of visits is nearly 6,000 more than

last year. The Trustees regret that the accommodation for the treatment of out-patients is not larger than it is. The Surgical Out-Patient Department is by far too small to care for the large number of visits made to that particular department. The Trustees deem the time not far distant when the present building will have to be replaced by another of larger proportions. It was pointed out in the annual report for 1890 that the building for the treatment of surgical out-patients was only a temporary expedient, and would have to be radically enlarged in a few years. The increase in the work done in this department, under more or less cramped conditions, make the prediction made at that time still more apparent. If the Trustees are expected to continue the treatment of the constantly increasing numbers of out-patients, an enlarged building for this work will soon be required.

The building for the other Out-Patient Departments, which was built and occupied in 1890, continues to be very satisfactory and equal to carrying on the work of these departments under the present method. It should be remembered, however, that seven out-patient services can only carry on their work by using rooms on alternate days. It is particularly desirable that some of these departments should have clinics daily. Considerable complaint is made on account of patients coming on the wrong day, and not being able to receive the treatment which their cases demand. The proper remedy can only be found in enlarging the present Out-Patient Department building, which should be done at the earliest opportunity.

WARDS FOR INFECTIOUS DISEASES.

There have been 1,233 cases of infectious disease treated in the hospital during the last year. This has been accomplished by using the Epidemic Hospital, under permission of the Board of Health, for scarlet-fever cases, Ward E for diphtheria cases, and Ward A for diphtheria and scarlet fever. The following table shows the number of cases of

infectious disease treated during the last four years, and the per cent. of increase :

STATISTICS OF THE CONTAGIOUS SERVICE DURING LAST FOUR YEARS.

Number of Cases of	1891.	1892-3.	1893-4.	1894-5.	Per cent. increase.
Diphtheria	237	387	438	698	194
Scarlet fever	164	272	301	254	54
Diphtheria and scarlet fever .	25	94	113	216	760
Other infectious diseases	91	72	99	65	
	517	825	951	1,233	

Deaths from					
Diphtheria	105	185	203	266	153
Scarlet fever	6	19	37	35	483
Diphtheria and scarlet fever .	11	39	47	47	330
	122	243	287	348	

The increase of 138 per cent. of infectious cases, with an increase of only 33 per cent. of room during four years, has caused a large amount of friction, and an undoubted increase in the rate of mortality. It has, moreover, brought criticism upon the condition of affairs in the hospital, which it was unable to rectify, as will be readily understood by those familiar with the treatment of infectious diseases in crowded wards. These complications, however, will be removed on the completion of the new hospital for infectious diseases.

The new department for infectious diseases, which has been under construction for the last two years, is fast approaching completion. It was expected that the wards would be ready to be delivered to the Trustees on or about January 1st. Many vexing delays, however, prevented this,

but the Trustees expect that the wards will be ready in a few months.

APPROPRIATIONS.

The Trustees desire to call your Honor's attention, as well as that of the City Council, to the matter of appropriations. Practically each year during the last five years, when estimates were made for expenditures during the coming year, the Trustees were directed that the appropriation should not exceed that of the previous year. The appropriation for 1890-1 was \$260,000. Although the Trustees, after careful consideration, have based the estimates each year upon the most probable want of that year, their estimates have been invariably reduced.

(Analyze table with reference to showing the increased amount of work and the same amount of appropriation each year.)

The Trustees have been necessarily obliged to keep the expenditures within the appropriation, to the detriment of the patients. By reason, however, of the large increase in the number of patients treated each year, this deficit in appropriation could only be made up in one of three ways: by closing some of the wards, by reducing the quality of the service, or by cutting off repairs to buildings. Neither the first nor the second method was wise, nor were the Trustees of the opinion that it should be done. They have, however, adopted the third method, and that is, to devote such money as is usually annually expended upon repairs, to subsistence supplies, salaries, and other necessary items for the maintenance of the hospital itself. Many of the older buildings require radical structural changes, not only to put them in good sanitary condition, but to afford facilities for the better treatment of the patients and carrying on the work. Considerable amount of plumbing has long been neglected. Roofs which have been patched and temporized should be wholly renewed. Old floors in use for many years should be replaced by new ones. These, and other improvements which have been year by year delayed for want of means,

have reached a point where delay cannot much longer be made. To make such radical repairs as the conditions of the buildings demand, would, in the opinion of the Trustees, require \$25,000 to \$30,000, which sum is not far from the amount which their appropriations have for the last few years been reduced from the estimates made.

The new hospital for infectious diseases will probably cost from \$100,000 to \$112,000 each year in annual appropriations, it being a new and special department. Four new wards are now under process of construction, including a new and much enlarged operating building. These, together with the new boiler house and dynamo station, ambulance stable, pathological laboratory, mortuary and mortuary chapel, must make a marked increase in the expenditures.

In a communication addressed to the Mayor of the city under date of February 9, 1894, the Trustees called attention to this fact as follows:

"The Trustees estimated and reported to the City Auditor that the sum of \$274,950 would be required to meet the expenses of this department for the present fiscal year. This estimate was made after a long and careful study of the finances of the department. The estimate was made from two points of view: first, from a careful estimate of the various subdivisions of expenditure according to classes; second, the actual cost of present year, plus the average yearly increase in the number of patients during the last four years.

"The amount appropriated for the last fiscal year was \$260,000. By reference to previous letters received from the Trustees, you will remember that they estimated at the end of the ninth month that there would be a deficiency. The Auditor's accounts show that it was necessary by transfers to increase the appropriation by \$5,763.62. The yearly average increase of patients during the last four years is $4\frac{1}{2}$ per cent.; and for the past month of January a still further increase, viz., 5 per cent. For the last fiscal year there were treated 527 patients more than the previous year. The daily average in the wards for the entire year was twenty-

four patients more in number. The number of weeks' board furnished to patients was 1,201 more ; the number of accident cases was larger ; the number of deaths notably larger, as well as the number of surgical operations. All these things, at an average weekly cost per capita, say, of \$10.09, means a larger expenditure, and the annual increase, it will again be noted, is constant for the last four or five years.

"The only methods by which the appropriation for the present fiscal year can be kept down to the amount appropriated by the City Council must be, first, the cutting off of all ordinary repairs in the subdivision known as 'buildings and grounds.' This the Trustees believe your Honor will not deem a wise method of management. Second, either by cutting down wages, or by deteriorating the quality of the service by the employment of a less number of people. Third, by a reduction of the quality of service given to patients in the way of general and medical supplies, appliances and methods of treatment, and otherwise reduce the cost of the medical and surgical department. Fourth, by rejecting a sufficient number of patients to make the cost come within the amount of appropriation allowed.

"As your Honor is fully aware, all the wards are now already crowded beyond the proper bed capacity of the hospital. To reduce the number of patients treated by closing one or more wards, in order to live within the present appropriation, would create a responsibility which the Trustees are unwilling to assume. There will be a considerable expenditure required on account of labor and work incident to the disturbed condition of the Surgical Department during the alterations of the Operating Building, that are not chargeable to the special appropriation of new buildings, and must also be paid out of the regular expenditures of the hospital, and it will cost at least \$6,000 to conduct the Epidemic Hospital, in addition to what was expended last year.

"These, and other reasons, if amplified, bring the Trustees to the conclusion, that \$260,000, which is \$5,763 less than actually expended last year, would be unequal to meeting the requirements for the coming year."

The Trustees therefore believe that they should make it clearly manifest that the hospital is no longer able to be maintained with anything like the appropriation it has annually received for the last five years.

THE TRAINING SCHOOL FOR NURSES.

The Training School for Nurses has graduated 374 pupils, of whom 33 have been graduated during the past year. The number of nurses (96) remains the same as last year.

The Trustees desire to renew attention to the fact that the accommodations for nurses still remain inadequate.

THE MEDICAL AND SURGICAL STAFF.

There have been no changes during the past year in the classification of services or in the number of physicians and surgeons in attendance upon them.

The following are the changes in the Medical and Surgical Staff: Edward H. Bradford, M.D., Visiting Surgeon, has resigned, and his vacancy has been filled by the promotion of Francis S. Watson, M.D., Assistant Visiting Surgeon. H. L. Smith, M.D., has been promoted from Surgeon to Out-Patients to Assistant Visiting Surgeon.

The following appointments have been made during the year: John L. Morse, M.D., Physician to Out-Patients; Paul Thorndike, M.D., and Edwin W. Dwight, M.D., Surgeons to Out-Patients; Joseph W. Courtney, M.D., Assistant to the Physicians for Diseases of the Nervous System.

BEQUESTS, GIFTS, AND PERSONAL ASSISTANCE.

The trust funds for the benefit of the hospital now amount to \$48,500. Of this amount, \$5,000 has been contributed during the year by Mrs. Ellen L. Hemenway, for the support of a free bed in memory of her late husband, Mr. Charles P. Hemenway. The Trustees desire to publicly acknowledge their gratitude to Mrs. Hemenway for her generosity, and they believe that other similar gifts would be wise for the benefit of the sick poor of the city.

The grateful acknowledgments of the Trustees, in many and various ways, are due to those who have rendered service to the patients by personal attendance, by visitations, and assistance. Numerous gifts of fruit and flowers and small sums of money have been useful, and have conduced to the comfort and welfare of the patients. Clergymen, hospital readers, singers who have furnished music in the wards on Sunday, the Fruit and Flower Missions and the Christmas and Easter Missions, besides many others who have manifested an interest in the patients of the hospital, are entitled to many thanks.

The Trustees are particularly thankful for the generous contributions at Christmas-time of toys, games, clothing, and much that goes to make up the festivities of the Christmas holidays.

They also gratefully acknowledge the gratuitous professional skill rendered by the various gentlemen comprising the Medical and Surgical Staff, which has placed the hospital on the highest plane among kindred institutions. The Trustees appreciate their devotion to the patients of the hospital, and gladly avail themselves of this opportunity to acknowledge their faithful services, as well as those of the Superintendent of the hospital, whose able executive management has been a most useful factor in the accomplishment of important results.

Respectfully submitted,

For the Trustees,

A. SHUMAN,
President.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

THE BOSTON CITY HOSPITAL, January 31, 1895.

To the Trustees:

GENTLEMEN: I have the honor to present herewith my annual report of the hospital for the year, February 1, 1894, to January 31, 1895, inclusive.

The following table shows the number of patients who have each year applied for admission, and been treated at the hospital:

	Patients examined for ad- mission.	Patients admitted.	Patients accident- ally injured.	Number of out- patients treated.
From June 1, 1864, to December 31, 1864 (7 mos.)	703	475	129	371
From January 1, 1865, to December 31, 1865.....	1,451	1,066	242	1,143
From January 1, 1866, to December 31, 1866.....	1,749	1,432	345	3,324
From January 1, 1867, to December 31, 1867.....	1,913	1,534	328	7,015
From January 1, 1868, to December 31, 1868.....	2,729	2,078	417	8,794
From January 1, 1869, to April 30, 1870 (16 mos.)	4,632	3,054	482	11,791
From May 1, 1870, to April 30, 1871.....	3,977	2,396	525	8,899
From May 1, 1871, to April 30, 1872.....	4,387	2,873	565	8,947
From May 1, 1872, to April 30, 1873.....	4,326	3,304	660	7,526
From May 1, 1873, to April 30, 1874.....	4,250	3,201	804	9,272
From May 1, 1874, to April 30, 1875.....	4,652	3,424	756	8,732
From May 1, 1875, to April 30, 1876.....	4,434	3,180	689	9,413
From May 1, 1876, to April 30, 1877.....	4,713	3,550	663	8,526
From May 1, 1877, to April 30, 1878.....	5,068	4,034	604	9,658
From May 1, 1878, to April 30, 1879.....	5,285	4,323	734	10,419
From May 1, 1879, to April 30, 1880.....	5,444	3,995	505	10,309
From May 1, 1880, to April 30, 1881.....	5,781	4,418	553	10,605
From May 1, 1881, to April 30, 1882.....	5,842	4,107	567	12,035
From May 1, 1882, to April 30, 1883.....	5,991	4,423	666	12,174
From May 1, 1883, to April 30, 1884.....	6,152	4,780	531	14,241
From May 1, 1884, to April 30, 1885....	6,072	4,331	676	12,005

Net cost to the City for maintaining Hospital proper \$180,500 18

The foregoing table of disbursements shows that the total expenditures of the Hospital Department during the fiscal year, February 1, 1894, to January 31, 1895, inclusive, were \$261,538.03. This sum was divided among the three departments as follows: For the hospital proper and Epidemic Hospital, \$246,342.39; for maintaining the Out-Patient Departments, \$6,828.12; for maintaining the Convalescent Home, \$8,115.20. There was also expended from the annual appropriation for new buildings, \$252.32. The Epidemic Hospital has been temporarily occupied as a relief for the treatment of scarlet fever, and as an auxiliary ward to the contagious service, and is therefore included in the

annual expenses of the hospital. The amount expended on this special item was \$6,755.44.

The expenditures for the hospital were partly for ordinary maintenance and partly for improvements or special purposes. There was expended for repairs and renewal of tents, \$497.76. These tents were not used this year, as the ground upon which they were located has been taken for a two-storied ward. Expenses for claims awarded amounted to \$145.00; for the fifth series of the Medical and Surgical Reports, \$397.40; for card cataloguing the clinical records, \$714.00; for fences, etc., \$120.57. There has also been expended for investigating the settlement of patients the sum of \$1,629.45. None of the above items should be included in the cost of the care of patients in the wards. These expenditures make a total of \$3,504.18, which, deducted from the gross expenditures of the hospital proper, leaves \$242,838.21 for current expenses. There should also be deducted the difference in the stock on hand at the beginning and close of the year, making \$242,726.32 as the cost of maintenance for the year ending January 31, 1895. This sum expended upon the care of 8,599 patients in the wards for 168,830 days' board, or 24,118 weeks, makes an average weekly cost of \$10.06, or daily cost of \$1.44 per hospital-patient of all classes, against \$10.09 weekly for the previous year. The total cost of maintenance and the weekly cost per patient represent the items of hospital statistics usually given in hospital finances. The weekly cost as usually computed in hospital reports, of patients treated in this hospital, is \$10.06, but the net cost to the city was only \$7.48. This actual weekly cost of the maintenance of acute cases in a large general hospital, conducted on a liberal scale under the requirements of best methods of medical and surgical practice, is not excessive. This moderate weekly cost could not be maintained if the daily average of patients was much reduced. From an economic point of view, this seems favorable to a large central hospital as against a smaller number treated in local hospitals, distributed over the city, as urged by the advocates of local or cottage hospitals.

There has been collected and paid into the city treasury during the year, \$60,837.98, on account of the board of all classes of paying patients, as follows :

From State cases	\$38,402 11
From town and city cases	7,273 43
From private and ward paying patients	15,162 44
<hr/>	
Total	\$60,837 98

There has been received \$1,300 interest from trust funds for the support of free beds, and \$88.16 from the sale of old materials. These sums, amounting to \$62,226.14, were paid in cash to the city treasury, and should be credited to the appropriation received. This would reduce the net cost to the city for the Hospital Department for all purposes during the fiscal year, to the sum of \$180,500.18.

The expenditures upon 18,073 out-patients has been \$6,828.12.

Statistics of the number of out-patients, the number of their visits, the rates of mortality, the work of the ambulances, the occupation, nativity, ages, civil condition, and physical condition of patients when discharged, are elsewhere tabulated, and may prove of interest in connection with hospital data.

The maximum number of patients on any one day was 540, as against 549 last year; the minimum number, 375, against 390 last year; the daily average during the year was $462\frac{54}{100}$, against $457\frac{34}{100}$ last year. The average length of stay was 19.63 days, against 19.05 last year. This daily average would have been notably diminished, except for the protracted residence of scarlet-fever patients, awaiting desquamation and convalescence. We should expect a lower average length of stay next year, after the new hospital for infectious diseases is opened.

The total expenditures for the Convalescent Home have been \$8,115.20. The benefits of the home have been given to 431 persons, who have received in all 8,943 days' board,

or 1,277 weeks, at a weekly average cost of \$6.35 per patient.

The total number of deaths from February 1, 1894, to January 31, 1895, was 1,060.

Of the deaths, there occurred within forty-

eight hours of admission	.	.	.	388 or .045 %
From diphtheria alone	.	.	.	266 or .031 %
From all other causes	.	.	.	406 or .047 %
<hr/>				
Total of deaths	.	.	.	1,060 or .123 %

the rate of mortality for the year ending January 31, 1895. The percentage of deaths given is for the total number of patients treated in the hospital.

Of all patients admitted, 388 died within forty-eight hours after admission, which indicated that they were brought to the hospital in a dying condition, and medical aid could not change the result. It will further be noticed that this number is 49 per cent. of those who died from all causes, except diphtheria.

During the year 8,599 patients have been treated in the wards, 18,073 as out-patients, and 431 at the Convalescent Home—a total of 27,103 who have received the benefits of the hospital in all departments.

During the year 11,617 persons applied for admission. Of this number, 8,064 were admitted and 3,553 were rejected, the latter number being 1,042 more than last year. The number rejected was 30 per cent. of all persons applying. This proportion will be markedly decreased as soon as the new wards are occupied. The causes of rejection appear in the table of applicants not admitted, on page 28. Of the number not admitted, 672 either changed their minds or were deferred. Of this number, however, 247 were admitted within three days after application. There were also rejected 612 solely for want of vacant beds, but 195 were admitted within three days. There were 629 patients who could be treated in the various out-patient departments,

without the additional cost of treating them in the wards. Admission was denied to 234, because sufficient information could not be obtained to indicate that they were cases suitable for admission. There were transferred to other and more appropriate institutions 132, and there were 197 rejected as clearly incurable and unsuitable for treatment. Various other lesser causes for rejection appear in the tabulated form.

On page 29 will be found a record of the ambulance work, showing the number of patients brought to and carried from the hospital. The total number of patients transported was 3,092, and the coupé was sent for surgeons and physicians 133 times. The number of accident cases received was 1,401.

The foregoing tabular forms are inserted for reference, and also to show the comparative statistics of a large city hospital as to the number of applicants for admission, patients admitted and treated, maximum and minimum numbers on any one day, daily average in the wards, and other hospital statistics during the last nine years.

Some interesting facts in regard to the work of the hospital are shown by the foregoing tables. There has been a marked and constant increase in the amount of hospital work. During the last five years there has been an increase of 43 per cent. in the number of patients applying for admission. The number of weeks' board and daily average have increased 20 per cent. While there has been an increase in all parts of hospital work, the total expenditure has not been markedly increased. Notwithstanding the fact that during the present year there has been furnished to patients 28,623 days' board, or 4,089 weeks more than five years ago, which is an increase of 20 per cent., there has only been an increase in the total expenditures of \$5,800, or 2 per cent. This difference in the larger amount of work and slight increase of expenditures is due to the fact that the appropriation for last year was limited to the necessities of maintenance. This condition is explained by two facts: first, that the ordinary repairs and renovations of the hospital buildings have been reduced to a minimum, and that the comparative cost of kinds of subsistence supplies has been much less during the last two or three years. The amount of money spent upon buildings is 60 per cent. less than four years ago.

The capacity of the hospital (500 beds) remains the same as last year. The increased daily average of five patients does not by any means indicate the difficulties of providing for the number of patients treated. When a hospital is already crowded, even a slight increase makes the problem of proper care one of considerable perplexity. As has been pointed out in previous reports, by reason of the large number of services and the fact that these services are divided into wards for each sex, for children as well as

adults, and for infectious diseases with varying complications, it has happened that some wards were crowded to excess while others had vacant beds. This has been one cause of the rejection of a larger number of patients than ever before, which has given rise to criticism and complaint. The public and even the medical profession do not fully understand the complex nature of classification in the treatment of patients. As the hospital is supported at public expense, the unthinking public feels it has a right to demand that all applicants should at all times be received, without stopping to consider the condition of the wards at the time. This will be in a measure remedied when the new wards now under construction are completed.

Like all other divisions, the out-patient departments show great accessions of work. In its various departments 18,073 were treated, against 17,010 last year. These patients have made 63,642 visits to the hospital, against 57,758 last year. An examination of the tables of pages 26 and 27 shows only one exception to the increased number of visits in all the departments.

The appropriation for the year was only sufficient for subsistence and general expenditures demanded by the immediate care of the sick, leaving only a small margin for repairs necessary to preserve or improve the large group of buildings. During the year only \$10,126 was expended upon buildings, grounds, drains, etc. The amount expended for 1893-4 was \$18,296; for 1892, \$21,275; for 1891, \$25,625; and for 1890, \$13,237.91. There has been a gradual decrease in this item during the last five years of 23 per cent. On account of the rapid deterioration of the buildings and the immense wear and tear to which they are naturally subjected from the large number of people, a special appropriation of larger amount will soon be required to make up for the repairs which should have been distributed over a number of years. The expenditures were made only for immediate damage, in order to keep the buildings in presentable order and safe, and in good sanitary condition. Wards A, E, H, S, K, L, Q, R, and S were in turn vacated, ceilings kalsomined, walls

painted, and the floors and furniture treated in the usual manner of preceding years. Many desirable improvements and alterations recommended in previous reports have not been carried out, because the appropriation of the department would not permit. Attention is again called to the fact that all the plumbing not recently renewed and some of which was put into the hospital nineteen years ago, should be reconstructed. As soon as the wards now devoted to the care of infectious diseases are vacated and the four new wards now building are occupied, it is recommended that wards K and L be radically improved, the purposes of the rooms rearranged, and a new system of ventilation put in. This is necessary to bring these two wards up to the standard of the other wards. Not less than \$12,000 would be required for this purpose, and should be procured by special appropriation, and not be taken from the annual expenditures for buildings.

The statistics for the Convalescent Home, which has just passed its fourth year, are as follows :

Number of patients in Home at the beginning of the year	30
Admitted during the year	401
Total treated during the year	431
Discharged during the year	405
Died during the year	0
Total discharged	405
Number remaining in Home January 31, 1895	26
Largest number on any one day	34
Smallest number on any one day	13
Daily average number of patients	24
Average length of stay in days	20

The daily average at the Home was 24, the same as last year. The weekly cost per patient this year has been \$6.35. The work of the year at the Home has passed without any special event, the management has been excellent, and the results in the treatment of convalescents very satisfactory.

The Training School for Nurses has finished its seventeenth year. The changes in the school during the last year have been as follows :

SUMMARY FROM FEBRUARY 1, 1894, TO FEBRUARY 1, 1895.

February 1, 1894, the number of nurses was . . . 96

During the year nurses have left as follows :

Have been graduated	33
Graduate head nurses resigned	4
Pupils dropped for various causes	13
Probationers not accepted	11
Graduate special no longer required	1
*Pupil nurse died	1
Pupil nurse allowed to resign	1
	<hr/>
Total vacancies	64
	<hr/>
Number remaining	32
Graduates retained as head nurses	8
Probationers admitted	54
Pupil nurses re-admitted	2
	<hr/>
	64
	<hr/>
Remaining January 31, 1895	96

Nurses connected with the school February 1, 1895 :

Assistant superintendents of nurses	3
Graduate head nurses	13
Senior pupils acting head nurses	5
Senior assistant nurses	27
Junior assistant nurses	37
Probation nurses	8
Graduates (Epidemic Hospital and Convalescent Home)	3
	<hr/>
Total	96

The Training School has graduated during the year thirty-three nurses, a total of 374 since the formation of the school. The Superintendent of Nurses and her assistants have given 205 class recitations. The school has received

* Valvular disease of heart.

twenty-seven lectures on Friday afternoons from members of the Medical and Surgical Staff. Fifty classes in massage have been conducted by Mrs. Bertha J. Raemisch. The course of instruction in cooking has been in charge of Mrs. Carrie M. Dearborn, assisted by Miss Mary A. Boland. Each nurse has received a larger number of lessons in cooking than in previous years, and more hours have been devoted to each lesson. The entire course of instruction will be found on page 153 and the distribution of studies on page 154.

The number of nurses (96) remains the same as last year. There have been fewer graduates, as an unusually large number have had their course of training interrupted, partly because those in the Contagious Service have had scarlet fever, measles, diphtheria (and other infectious diseases). With sincere regret we chronicle the death of Miss Ruth E. Hutson, who died of valvular disease of the heart. She was a nurse who gave much promise, and by her character and work commanded universal respect.

There are now twenty graduates of the school engaged in various capacities in all departments. The wisest policy demands retaining graduates sufficient to fill the position of head assistants in all departments as well as head nurses.

Repairs have been made on the Nurses' Home, demanded by the inevitable deterioration of ten years' wear and tear. Rooms, corridors, and stairways have been painted, ceilings kalsomined, and the parlors refurnished. The general library at the Nurses' Home contains 585 volumes, and the library of text-books 239 volumes.

The regular meetings of the Nurses' Club have been continued on the first Tuesday evening of each month, from October to June. The following are among the topics that have been considered or discussed: "American and Foreign Hospitals Compared;" addresses by Dr. Rowe, Sister Anna, and Miss Somerville; "Some Thoughts on Recent Advances in Surgery;" address by Dr. Burrell; discussion on "The Registration of Graduate Nurses in Boston. Is the present method the best?" Discussion on the three

years' course of training for American training schools for nurses; papers read by graduates. Christmas reunion and supper at the Nurses' Home. Address by Dr. Clarence J. Blake; "The Post-Graduate Course of the Massachusetts Eye and Ear Infirmary," and the aims and objects of the Graduate Nurses' Association. The "Question Box" meeting.

These meetings have been largely attended by the graduates, and have awakened a lively interest. The nurses esteem these meetings as valuable in their professional work, and also for the opportunities for social reunions.

The Training School has been conducted with more than usual success. The large amount of ward work has given unusual opportunities for experience, and both the instruction and drill has been increased.

The Medical Library has been increased during the year by 171 bound volumes, making a total of 3,003; 395 pamphlets were received, and 472 medical periodicals.

The card catalogue of clinical case books has increased during the year, and now amounts to 94,805 cards of references and cross references. Eight hundred and twenty-five volumes of the clinical records are now catalogued, these records including the various services during the last thirteen years.

The hospital has long had a library for patients, but it was old-fashioned, and the books had gradually become badly worn. It was kept in the administration building, and the size of the hospital made it practically inoperative, and it had fallen into disuse. The Goodnow Library Fund had accumulated, until there was a balance on hand of \$854.01. Instead of renewing the old library, the plan was adopted of putting in each ward a special library. Eighteen libraries of about sixty volumes each, in special bookcases easily accessible, have been placed in nearly all the wards. We have endeavored, in selecting the books, to afford a miscellaneous reading adapted to the patients in each ward. The books are designed chiefly for diversion and entertainment of the sick, and partly for instruction. The cost of these ward libraries was \$794.69, but they have already been

used sufficiently to prove the wisdom of this system of hospital libraries for ward patients.

The Boston City Hospital Medical Society has been organized during the present year, and holds its meetings in the Medical Library on the second Thursday evening of each month. The society is made up of the Medical and Surgical and House Staffs, both those connected with the hospital at the present time, and past members. The society has availed itself of the large number of special unique cases nearly always to be found in the wards. The society may be confidently said to be one of the most valuable and interesting of the medical societies in this city.

The work of the past year has been arduous, and carried on under much difficulty. The accommodations of the hospital have not been equal to the demands. The wards have been crowded the greater part of the year, which has tended to lessen the finish in the work of the nursing service, and has affected the discipline of the wards in many cases unfavorably. The difficulties pointed out in previous reports, as due to the carrying on of infectious cases in wards adjoining the hospital, have again complicated the hospital work. The occupation of the new department for infectious diseases and the completion of the new wards now under construction are expected to relieve many of the difficulties incident to the past four or five years.

I desire to express my thanks to the gentlemen of the Medical and Surgical Staff for their advice and coöperation, which is at all times appreciated.

The officers, house officers, nurses, and employés are entitled to their share of credit for whatever praise may be accorded to the successful work of the year.

In presenting this, my sixteenth annual report, to the Trustees, I desire to express in the largest degree my renewed obligations for their many official and personal kindnesses and favors.

I have the honor to be

Your obedient servant,

G. H. M. ROWE, M.D.,

Superintendent and Resident Physician.

MEDICAL AND SURGICAL STATISTICS.

MEDICAL DISEASES.

Classified according to the Nomenclature of Diseases, as published by the Royal College of Physicians of London, and American Medical Association.

BEQUESTS.

GOODNOW FUND. — ELISHA GOODNOW, of South Boston, who died in the year 1851, bequeathed to the city "all the rest and residue of my estate, real and personal, not otherwise disposed of," for the purpose of establishing, in the Eleventh or Twelfth Wards of the city, a hospital for the sick; one-half of said fund to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the officers of the government of said hospital for the time being. Under this will the city came into possession of \$26,000 for the support of free beds.

NICHOLS FUND. — LAWRENCE NICHOLS, who died in September, 1862, made a bequest to the city of the sum of \$2,000 for "the establishment and endowment of a city hospital."

NORCROSS FUND. — 1868, January 1. The Trustees received the sum of two thousand dollars from Hon. OTIS NORCROSS, as the foundation of a fund for the benefit of patients leaving the hospital poor and destitute of proper clothing.

Balance on hand, February 1, 1894	\$329 21
Received interest	127 50
	<hr/>
	\$456. 71
Expended	118 71
	<hr/>
Balance, January 31, 1895	<u>\$338 00</u>

BALL FUND. — 1870, April 1. The Trustees received from the estate of Mr. JONAS BALL the sum of one thousand dollars for the same purpose, and under the same restrictions, as the Norcross Fund.

Balance on hand, February 1, 1894 . . .	\$89 68
Received interest	40 00
	<hr/>
	\$129 68
Expended	10 00
	<hr/>
Balance, January 31, 1895	<u>\$119 68</u>

GOODNOW LIBRARY FUND. — 1874. Donation of GEORGE GOODNOW, the interest of which to be expended annually by this Board of Trustees in replenishing the library of the hospital with books and pamphlets suitable for the reading of the patients during convalescence.

Balance on hand, February 1, 1894 . . .	\$791 51
Received interest	62 50
	<hr/>
	\$854 01
Expended	794 69
	<hr/>
Balance, January 31, 1895	<u>\$59 32</u>

SHAW FUND. — 1875. Bequest of the late MARY LOUISA SHAW, the income of which to be expended by the Trustees for the purchase of flowers and fruit, for the use and comfort of the patients in the hospital.

Balance on hand, February 1, 1894 . . .	\$375 01
Received interest	170 00
	<hr/>
	\$545 01
Expended	106 63
	<hr/>
Balance, January 31, 1895	<u>\$438 38</u>

PERKINS FUNDS. — 1889. Bequest of the late MARY G. PERKINS, the income of which is to be expended for books for a medical library at the hospital, and for the purchase of

artificial limbs and surgical appliances for the use and relief of patients leaving the hospital.

Balance on hand, February 1, 1894	\$247 97
Received interest	300 00
	<hr/>
	\$547 97
Expended	257 40
	<hr/>
Balance, January 31, 1895	<u>\$290 57</u>

CHEEVER FUND. — 1889. Gift of Dr. DAVID W. CHEEVER, senior visiting surgeon, the income of which is to be semi-annually expended by the Trustees, to purchase and present each house surgeon, when his service expires, a pocket case of surgical instruments, as a gift from Dr. DAVID W. CHEEVER.

Balance on hand, February 1, 1894	\$21 11
Received interest	80 00
	<hr/>
	\$101 11
Expended	80 00
	<hr/>
Balance, January 31, 1895	<u>\$21 11</u>

CHARLES P. HEMENWAY FUND. — 1894. Gift of Mrs. CHARLES P. HEMENWAY, of \$5,000. The interest of this sum to be expended for a free bed, to be known as the Charles P. Hemenway Memorial Bed. No interest has become due at the date of this report.

RECAPITULATION OF CITY HOSPITAL TRUST FUNDS.

The "Act to incorporate the Trustees of the City Hospitals of the City of Boston" (see Acts and Resolves, 1880, Chap. 174, approved April 7) provides that "money received by it shall be invested by the Treasurer of the city of Boston under the direction of the Finance Committee of said city; and all securities belonging to said corporation shall be placed in the custody of said Treasurer; provided always that both the principal and income thereof shall be appropriated according to the terms of the donation, devise, or bequest, under the direction of said corporations."

HOUSE RULES.

WITH RULES FOR ADMISSION, DISCHARGES, AND GOVERNMENT OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

All employés shall be in their respective places during the hours of duty.

The doors and gates of the Hospital will be closed at 10 o'clock P.M., at which time all inmates shall be quiet, and all not on duty shall be in their rooms.

A record shall be kept of all persons entering the Hospital between the hours of 10 P.M. and 7.30 A.M.

No employés shall be absent from the Hospital, except as permitted by special rules or by the Superintendent.

The use of tobacco, wine, and intoxicating liquors is prohibited within the Hospital, unless prescribed by a physician or surgeon.

All profane and obscene language, loud talking, and incivility are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the Hospital on each day of the week, Sunday excepted, between 9 and 12 o'clock A.M.

Whenever able the patient shall apply in person. When not able to apply in person, on application made by a friend the patient may be visited at his residence.

Any Trustee, or either of the physicians or surgeons in attendance, may, in case of emergency, send a patient in the first instance to the Hospital by written permit.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee, and the committee shall, except as above, have power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted, or change the terms of admission.

Patients may be admitted by the Trustees to the privileges of the Hospital at such rates of board as the Trustees may, from time to time, determine, payment for such board being secured by the friends of the patients or by the authorities of the city or town to which the patients belong.

Whenever, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or part of the board shall be paid. If separate apartments or articles not usually furnished at the Hospital are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease or alcoholism shall be admitted except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which are deemed capable of being relieved.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent as before provided.

Patients discharged on the recommendation of the physicians or surgeons shall be provided with a certificate, stating their condition at the time of discharge, whether cured, relieved, or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

In case of the decease of a patient the Superintendent shall sign the death certificate. He shall also state the time and cause of death, the disposition made of the body, whether

delivered to friends or buried from the Hospital, in which latter case he shall mention the place of interment.

The body of any person dying at the Hospital shall not be delivered without a written receipt from the parties taking the same.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visits of the physicians and surgeons, between 2 and 3 o'clock on visiting days, and always by 7.30 o'clock P.M., unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and in such other services as may be reasonably required of them.

No patient shall leave the Hospital grounds without a pass from the Superintendent, nor his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking, and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of any particular religious rite shall be indulged when practicable.

Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable shall be by them reported to the Trustees.

VISITORS.

No person shall visit any part of the premises, except on business, or at such time as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday, and Saturday of each week, from 2 to 3 o'clock P.M., friends may be permitted to visit patients, though no patient shall receive more than

two visitors on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

Patients who are considered dangerously ill are permitted to see friends in reasonable numbers, and at reasonable hours during the day, but friends visiting such patients should not remain later than 8 o'clock P.M., and are not permitted to remain all night unless it seems probable that such patients will not live through the night.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission from the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left with the Superintendent.

RULES OF THE CONVALESCENT HOME.

The department of The Boston City Hospital located at No. 2150 Dorchester avenue, near Milton Lower Mills in Dorchester, is known as the Convalescent Home, and shall receive such *patients recovering from acute diseases as shall be transferred to it from the main Hospital for treatment during convalescence.*

The Superintendent of the Hospital shall, under the direction of the Trustees, have the control and management of the Convalescent Home, in the same manner as of other departments of the Hospital.

The Superintendent shall appoint, subject to the approval of the Trustees, a Matron, and shall employ under their direction such further assistants as may be necessary for the proper conduct and service of the Home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the Home, and the control of all nurses and other employés and patients. She shall reside at the Home.

ADMISSION AND DISCHARGE OF PATIENTS.

Patients shall be transferred from the Hospital to the Convalescent Home by the Superintendent, subject to the direction of the Trustees, on recommendation of the Visiting Staff or otherwise; and the Superintendent shall keep a record of all patients so transferred. When patients are so transferred they shall be considered as discharged from the Hospital. Payment of their board shall be required, the same as of patients at the Hospital, but separate apartments shall not be furnished at the Home. No person whose case is judged to be incurable shall be admitted to the Home.

Patients shall not be allowed to remain at the Home for a longer period than two weeks, except on recommendation of the physicians, or for special cause approved in writing by

the Superintendent. All patients remaining beyond the period of four weeks shall be forthwith reported to the Visiting Committee, and to the Trustees at their subsequent regular meeting.

Patients when discharged shall be provided with a certificate, stating the date of admission and discharge, and their condition when leaving the Home.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all rules established for the government of the Home.

Patients shall rise at 7 o'clock in winter, and at 6.30 in the summer. Breakfast shall be served at 7.30 o'clock in the winter, and at 7 o'clock in the summer; dinner at 12 o'clock, and supper at 5.30 o'clock. Patients shall retire at 8 o'clock during the winter, and at 8.30 o'clock during the summer, and shall be quiet during night hours.

Such patients as are, in the opinion of the Matron, able, shall assist in light domestic work, and perform such other services as may be reasonably required of them, subject to the approval of the Superintendent or physicians.

No patient shall leave the house without permission, nor shall depart from the grounds of the Home without a pass from the Matron.

No patients shall purchase, or cause to be purchased for themselves, any article of food whatsoever, nor any other article, without the consent of the Superintendent or Matron.

Patients shall not talk to one another of their ailments.

Improper language, loud talking, and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be indulged when practicable.

Complaints, from whatever cause, may be made to the Matron, the Superintendent, or Visiting Committee, and if of sufficient importance shall be reported to the Trustees.

VISITORS.

Friends may be permitted to visit patients on week-days, between three and four o'clock in the afternoon. In all cases the Trustees, Superintendent, and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the Home and grounds at the expiration of the visiting hour, and shall visit no part of the Home or grounds other than the reception-room, except by permission from the proper authority.

No person shall give any article of food or drink to a patient, unless by permission of the Matron.

THE BOSTON CITY HOSPITAL. TRAINING SCHOOL FOR NURSES.

THE Trustees of The Boston City Hospital, in 1878, established a Training School for Nurses, in order to give to women desirous of becoming professional nurses a systematic course of training and practice.

The Training School is controlled by the Trustees of the Hospital, like all other departments of the Hospital service. The Superintendent of the Hospital has the general supervision of all matters relating to the school, its course of work and study, lectures and discipline. The Superintendent of Nurses has the immediate charge of all the nursing in the Hospital, of all persons employed in the wards, and also the instruction and management of the nurses in the Training School. All female nurses in the Hospital must be connected with the school.

The course requires two years, and includes general medical and surgical nursing, together with ophthalmic, aural, and gynæcological nursing, and also the nursing of contagious diseases. Maternity nursing is theoretically taught, but there are no maternity wards connected with the Hospital. Those wishing to receive such a course of instruction should apply to the Superintendent of The Boston City Hospital.

The most desirable age for candidates is from twenty-three to thirty-five years. They must be of sound health, and should send with their application a certificate from a physician, certifying to the fact. They should also send a brief personal history, and give the names and addresses of three responsible persons not of their own kin who know of their good character and capabilities. Upon the recommendation of the Superintendent and the approval of the Trustees, they will be received for two months on probation. The fitness

of candidates for the training and work, and the propriety of retaining or dismissing them, will be determined by the authorities in charge of the school, under the direction of the Trustees.

At the end of the first month, candidates, if considered satisfactory, are permitted to wear the cap and enter upon the regular course of training, but such candidates are not permitted to join the school formally until the end of the second month, when, if accepted, they sign an agreement to complete the prescribed course of two years, and to conform to all rules. At the end of the first six months the record and work of each pupil are carefully scrutinized as to her fitness to make a good nurse, and the right is reserved by the authorities of the Hospital to terminate then, or any time, the connection of any pupil or nurse with the school, for inefficiency, misconduct, generally unsatisfactory record, or for any other reason which may be deemed sufficient.

During the first two months pupils are called Probationers, for the remainder of the first year, Junior Nurses, and during the second year, Senior Nurses. Nurses who remain in the Hospital after graduation become Head Nurses.

The nurses in the Training School (including Probationers) reside at the two Nurses' Homes connected with the Hospital, which have rooms for ninety nurses. The houses afford home-like surroundings, and have the best of conditions necessary to good health and personal hygiene.

The Superintendent of Nurses has the immediate charge of the Training School, under the authority of the Superintendent of the Hospital and of the Trustees, and the nurses are subject to the rules of the Hospital, like any other service.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc.; giving baths, keeping patients warm or cool, prevention and dressing of bed-sores, and proper management of the patient under various conditions, with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus, applying

of fomentations and poultices, the dressing of burns, ulcers, and wounds, and other minor dressings, cupping, leaching, and subsequent treatment, the administering of enemata, and use of the female catheter.

Nurses are taught how to act in the various emergencies occurring in hospital and private nursing, as well as in the accidents of ordinary life. They are also given lessons in *massage* by a professional instructor. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner, and the feeding of helpless patients, or those who resist food.

Instruction is also given in the best practical methods of supplying fresh air, of warming and ventilating sick-rooms in a proper manner, and the proper care of sick-rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin, and eruptions; of mental condition as to delirium, stupor, shock, etc.; of the condition as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds and the after-treatment in surgical operations; and in the managing of convalescents. Nurses are taught the administering of medicines and the application of external remedies, how to take notes on cases, the making up of the nurse's record, and the reports to the attending doctor.

The course of training includes a fixed course of instruction during the two years from manuals and text-books, mainly given by the Superintendent of Nurses, the Assistant Superintendent of Nurses, and graduate head nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the Hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes, and models is considerable, the main reliance is upon accurate daily drill in the wards, operating rooms, and other departments of the Hospital. Examinations, both written and oral, are held from time to time by the authorities of the school and by

the Hospital staff, and nurses cannot pass to graduation unless attaining, on critical marking, at least seventy per cent.

The pupils are employed as assistant nurses in the wards, operating rooms, and out-patient departments of the Hospital. They are given six months' training in medical wards, and six months' in surgical wards; the remainder of the time to be in such wards or departments as the management may appoint.

Probationers are not paid during their first month, but for the remaining months of the junior year they receive ten dollars (\$10) per month, and for the senior year, fourteen dollars (\$14) per month, to pay for the expenses of their uniform, personal clothing, and other minor requirements. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services. When the full term of two years is completed the nurses receive, if they pass all the examinations and are otherwise satisfactory, a diploma certifying to the regular course of training and practice, and are then permitted to wear the graduates' badge of the school.

The majority of graduates engage in private nursing, but some are invited to remain in the service of the Hospital as head nurses, and receive twenty dollars (\$20), twenty-five dollars (\$25), thirty dollars (\$30), thirty-five dollars (\$35), per month, with opportunities of promotion. Graduate head nurses who prefer to remain in hospital work, or return after a term of private nursing, are given post-graduate instructions in ward management, hospital house-keeping, and minor administration.

The school year has no fixed date, but accepted candidates may enter whenever vacancies occur. They are, as a rule, received in the order of acceptance, but those desiring to enter with less delay can generally anticipate a fixed date by placing themselves on the emergency list. When coming to the Hospital they should bring with them the following articles: Three gingham or calico dresses, made plainly; eight large white aprons, made of bleached cotton, with bibs,

plain at the top and gathered slightly at the bottom, two buttons on the band, with hem at bottom four inches in depth; two bags for soiled clothes; one pair of scissors, a pin ball, and a napkin-ring; a good supply of plain under-clothing — every article to be distinctly marked with indelible ink, with the owner's name. Twenty-one pieces are allowed for the laundry each week.

Nurses must bring suitable outer-garments for stormy weather, and they are required to wear noiseless broad-toed and flat-heeled boots. If the teeth are out of order in any way, they must receive attention before coming for the probationary month. Nurses are required to wear the Training School uniform after they join the school. Material for dresses will be sold at cost price; caps are furnished free of charge.

Hours of duty for day nurses are from 7 A.M. to 8 P.M.; for night nurses from 8 P.M. to 7 A.M. No nurse is required to do both day and night duty on the same day, except in rare emergencies. Each nurse on day duty is allowed one hour after 2 o'clock P.M., for rest and recreation, one-half day after 2 P.M. each week, and four hours on Sunday. Two weeks' vacation is allowed each year. If nurses are sick they are cared for in the Hospital, but wages are stopped. Nurses on night duty are required to be in bed until 4 P.M. Nurses may be called upon for four months' regular night duty during the two years' training; besides "special cases" to a limited number.

COURSE OF INSTRUCTION.

JUNIOR YEAR.

Manual of Hospital Nurses (1)	<i>Domville.</i>
Manual of Nursing: Medical and Surgical (2)	<i>Humphrey.</i>
Lectures on Fever Nursing (3)	<i>Wilson.</i>
The Care of the Sick	<i>Billroth.</i>
Notes on Surgery for Nurses	<i>Bell.</i>

DISTRIBUTION OF STUDIES.

Monday,	2 to 5 P.M.	Junior and Senior Nurses, <i>Massage</i> .
	3 P.M.	Senior Nurses [section], <i>Massage</i> .
	8 P.M.	Head Nurses; hospital administration, ward management, minor executive work, training of Assistant Nurses.
Tuesday,	11 A.M.	Senior Nurses [section], Operating-room.
	2 P.M.	Junior Nurses [5th class], Recitation.
	2 P.M.	Senior Nurses [section], <i>Massage</i> .
	3 P.M.	Senior Nurses [section], <i>Massage</i> .
	3.30 P.M.	Junior Nurses [3d class], Recitation.
Wednes.,	3.30 P.M.	Junior and Senior Nurses [4th class], Recitation.
Thursday,	2 P.M.	Senior Nurses [section], <i>Massage</i> .
	3 P.M.	Senior Nurses [section], <i>Massage</i> .
	3.30 P.M.	Junior Nurses [4th class], <i>Recitation</i> .
Friday,	11 A.M.	Senior Nurses [section], in Operating-room.
	2 P.M.	Senior Nurses [1st class, 1st Div.], Recitation.
	3 P.M.	Junior Nurses [2d class], Recitation.
	4 P.M.	Lecture to School in Operating Amphitheatre by a member of the Medical and Surgical Staff.
Satur'y,	2 to 5 P.M.	Senior Nurses, Cooking class.

LIST OF LECTURES AND SUBJECTS.

A lecture is given to the Training School on Fridays, at 4 P.M., in the Operating Amphitheatre, by a member of the Medical and Surgical Staff, once a week between September 15 and June 15. The following are among the lectures given:

Five. — Surgical Dressings; poultices, washes, fomentations, bandaging, splints, leeches and blisters, enemata, surgical hæmorrhage, etc.

Three. — Theory of Wounds: modes of healing, granulations, ulcers, cellulitis, suppuration, sloughs, erysipelas, pyæmia, gangrene, sepsis, etc.

Three. — Bacteriology, brief history and general theory: micro-organisms; general distribution in air, water, etc. Elementary consideration of pathogenic and non-pathogenic micro-organisms. Exhibition of apparatus and cultures. Practical points for nurses.

Two. — Theory of Sepsis: aseptic treatment, different methods; dressings, with demonstrations and "quiz drill."

Two. — Emergencies: hæmorrhage, burns, heat-stroke, fits or seizures, drowning, fractures, immediate treatment of wounds and injuries, foreign bodies in eye, nose, and ear, poisons, domestic emergencies, and practice of expedients.

Two. — Surgical anatomy and landmarks, hæmorrhages, etc.

One. — Surgical Operations: care of patient before, during, and after operations; anaesthesia and recovery; accidents, hæmorrhage, shock, especially as in private nursing.

One. — Abdominal Surgery; including ovariectomy, herniotomy, operations for abdominal injuries, etc.

One. — Fractures: varieties, preparation and care of splints and apparatus for treatment, management of cases, etc.

Three. — Medicines: avenues of taking; preparation and doses; classes of internal and external poisons; cautions; hospital formulæ.

One. — Nursing in Fevers: theory of fever, symptoms and course of, different plans of treatment, nurses' duties as to symptoms, bed, clothing, secretions, baths, food, and management of cases.

Four. — Infectious fevers, especially diphtheria and scarlet fever; symptoms and course of disease; complications; infection and contagion; special nursing in croup, laryngitis, tracheotomy, intubation, etc.; management of patient, and surroundings; personal hygiene of nurse in attendance, etc.

Two. — Symptomatology in Disease; what and how to observe accurately; vital organs and special symptoms. The model sick-room: temperature, light, ventilation, care of bed, bedding, and clothing, furniture, utensils, disinfection, cleansing, dusting, etc.

One. — Contagious Fevers and Epidemics: prevention of contagion, disinfection, care of habitation, etc.

Three. — Care of Children in Health and Disease: diet and clothing of infants and children; various infantile diseases.

Two. — Physiology of Pregnancy and Labor: delivery, confinement nursing.

One. — On Gynæcological Nursing: preparation of patient for examination or operation; operations after treatment, douches, use of catheter, etc. (Demonstrations to sections of senior nurses in Ward S operating-room.)

One. — Special Nursing in Nervous Diseases, including the Insane.

Two. — Special Nursing in Skin Diseases and Syphilis in the Infant and Adult.

One. — { Special Nursing in Diseases of the Eye.
Anatomy and Physiology of the Eye, and General Care in Health and Disease.

One. — Special Nursing in Diseases of the Ear: its care in health and disease: nurses' duties at operations and continued treatment in disease.

Two. — Food Values and Principles of Cooking Food.

One. — Urine: characteristics, properties, including taking notes on same, and brief analysis. Drill in laboratory by classes in sections.

One. — *Massage*, its history, theory, and modes of application.

Three. — Visceral Anatomy: demonstrations by post mortems; care of the dead, etc.

LIST OF GRADUATES.

THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

[* Married. † Died.]

[The Badge of Graduate Nurses.]

1879.

Miss Rosa McCormick,	Miss Elizabeth A. Andrews,	
“ N. Elizabeth Fillebrown,	* “ Myra E. McIlvin,	
† “ Mary L. Kelso,	* “ Martha J. Blackwood.	(6)

1880.

Coffee, or Tea, Shells, or Cocoa, with Milk and Sugar. Bread (Wheat or Graham), Butter.

EXTRAS. — In addition to the above, the following extras may be ordered by the Visiting Physician and Surgeons: Milk, Beef Tea, Chicken Broth, Mutton Broth, Gruel, Oatmeal Mash, Corn Starch, Boiled Rice, Eggs, Beefsteak, Mutton-chop, and Chicken.

A small allowance of Milk and Beef Tea will be provided for each ward daily. The House Physician or Surgeon may order these articles by a signed special order, in each case, when needed, for patients who enter in the intervals between the regular visits of the Visiting Physician or Surgeon to whom the case is assigned.

All Wines and Liquors, Ale, Beer, etc., will be ordered by the Visiting Physicians and Surgeons only, excepting in emergencies, when special orders for the same may be given by the House Physician or Surgeon, to be afterwards approved by the Visiting Physician or Surgeon, as the case may be, or by the Resident Physician.

JULY 2, 1878.

By Order of the Trustees.
